The Perfectly Matching Home

When creating a beautiful and stylish home, details are everything. A front door with matching hardware creates a great first impression.

With Fab&Fix it doesn't have to stop at the front door. Our ever growing set of interior fittings perfectly match with the rest of our range – not just in colour, but in form as well.

Every homeowner can find the details that will complete their home, whatever their personal style or budget.

Hardware may be the last thing fitted, but it's where the eye falls, the part we most frequently touch and operate, and the aspect by which we judge overall quality.

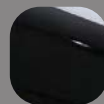

Our Range

- The original luxury suited hardware range
- Over 160 products

Tested beyond the limits

At the same UK site, our dedicated research and testing laboratory puts all new designs through a rigorous process of endurance and functionality testing.

Only designs that meet our own discerning standards, often beyond those demanded by the industry, go through to production.

Quality takes time

5 years in development, Hardex Electro finishes are among the most resilient and attractive in the world today.

Time is everything in our unique process, it takes over 24 hours to plate a single handle.

Meticulous preparation of the surface material is followed by a complex series of chemical baths, each submersion calculated to the second. Only then is the product ready for a Hardex Electro plate to be applied before curing in extreme temperatures.

It's a lot of effort, but we hope you'll agree it's worth it.

Our Hardex Electro finishes have been tested to exceed industry standards in every category of performance.

TEST	INDUSTRY STANDARD	HARDEX ELECTRO*
Corrosion Resistance	240 hours [†]	1,000 hours
UV Light Resistance	120 hours	500 hours
Abrasion Resistance	5 litres of sand	18 litres of sand
Smear Resistance	100 double rubs	1,000 double rubs
Pencil Hardness	2N - 3N	4N - 5N

* Tests performed on Hardex Gold

[†] British Standard 1670:2007 rates 240 hours of corrosion resistance as 'Grade 4: very high corrosion resistance'. Hardex Electro finishes exceed this standard.
